

ACCESSING THE JIT

To access the JIT you will require access to either a NIPRNET (Internet) or SIPRNET workstation and a web browser.

NIPRNET USERS

Please visit this URL:

<http://jit.fhu.disa.mil>

Click on “*Apply for User Account.*” Fill out the request form completely and then click on the submit button. You will be assigned a username and password immediately after you hit the submit button.

IMPORTANT: The assigned username and password will NOT be activated at this time. Designated approval authorities at the JITC will review each application. Turn-around time will be approximately 48 hours. You will be notified via e-mail whether your request has been approved or denied.

SIPRNET USERS

Please visit this URL:

<http://199.208.204.125/jitc.htm>

This is a SIPRNET address and cannot be accessed via the NIPRNET (Internet).

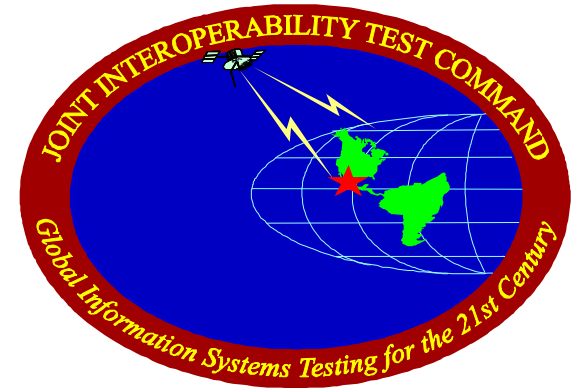

Please note that the SIPRNET JIT does not require a user account (i.e., username and password). Access to the SIPRNET JIT is open to all cleared personnel with access to a SIPRNET workstation.

Please visit the JITC Web Site at the following URL:

INTRODUCTION

The JITC Joint Interoperability Tool (JIT) provides high speed access to key interoperability information. The heart of the system is an extensive data repository featuring the JITC Lessons Learned Reports, JITC Test Reports, the NATO Interface Guide, Joint Interoperability Certification letters, and other interoperability documents and references; as well as a high speed search engine to quickly access data. This tool gives a quick and easy on-line capability which identifies system/equipment characteristics, tested configurations and practical "how-to" information to facilitate interoperability.

JIT FEATURES

◆ **Search:** The search capability makes it easy for you to find what you need on the JIT. You may search either on keywords or concepts. To begin, enter a keyword(s) or equipment nomenclature inside the query box, then click the Search button.

Select a document you wish to view based on the document summary. The selected document can then be viewed, including links and graphics.

◆ **What's New:** Provides a list in tabular format of all the new JIT documents and updates for the last few months.

◆ **NATO Interface Guide:** Provides network planners and equipment users guidance, alternative solutions, and additional configurations for interfacing switching equipment of different nations into networks providing those communication capabilities required by the NATO forces.

◆ **Deployed Internetworking Test:** Provides links to the most recent DoD Interoperability Communications Exercise (DICE) Executive Reports and Detailed Test Reports. The Detailed Test Reports are divided into major sections by equipment type from which users may select specific tests.

◆ **Bosnia Reports:** Provides a selection of reports on various Bosnia demonstrations, assessments and joint endeavors.

◆ **Lessons Learned Reports:** Provides relevant information regarding tactical and strategic C4I equipment and systems. Reports published over the last 6 years are available at this site. The Lessons Learned reports are organized both by date and by equipment type.

◆ **Lessons Learned from the Field:** Lessons Learned from the Field allows an organization with access to the SIPRNET or NIPRNET to submit a lessons learned suggestion. Suggestions are verified by JITC staff and if accurate, incorporated into the JITC Lessons Learned Report. This page also allows you to check the status of Interoperability Lessons Learned Inputs received from the field.

◆ **Certification Summaries:** Complete listing of certifications since FY94. The recent certification summaries (FY96 and on) also include the certification letters and testing summaries.

◆ **Test Reports:** Lists numerous test reports organized by type:

- ◆ Reports on DISA Programs
- ◆ Interoperability Test Reports
- ◆ Conformance Test Reports
- ◆ Operational Test Reports
- ◆ Assessment Reports

◆ **JWID Reports:** Joint Warrior Interoperability Demonstration (JWID) Reports.

◆ **JCS Manual for Employing Joint Tactical Communications:** Provides the 7 Volume Joint Chiefs of Staff Manual for Employing Joint Tactical Communications. Each volume includes a hyper-linked table of contents for that particular volume for easier navigation.

◆ **References:** Instructions & directives may be viewed on-line in their entirety.

◆ **And More:** JITC Points of Contact, JITC Annual Report, The JIT Tour, Site Statistics, Feedback, etc.
